I.		Basis of the repo	rt					
1.	1. With regard to the elements of the international application:*							
	X	the international application as originally filed.						
		the description,	pages , as originally filed,					
İ			pages, filed with the demand,					
1			pages, received on with the letter of					
	Ш	the claims,	pages, as originally filed,					
İ			pages , as amended (together with any statement) under Article 19,					
			pages, filed with the demand,					
			pages, received on with the letter of					
		the drawings,	pages, as originally filed,					
			pages, filed with the demand,					
!			pages, received on with the letter of					
		the sequence listi	ng part of the description:					
•			pages, as originally filed					
			pages , filed with the demand					
			pages, received on with the letter of					
2.	which the international application was filed, unless otherwise indicated under this item. These elements were available or furnished to this Authority in the following language which is:							
	H	the leaves of a	translation furnished for the purposes of international search (under Rule 23.1(b)).					
		the language of publication of the international application (under Rule 48.3(b)).						
		the language of the and/or 55.3).	te translation furnished for the purposes of international preliminary examination (under Rules 55.2					
3.	With pre	th regard to any nucleotide and/or amino acid sequence disclosed in the international application, the international preliminary examination was carried out on the basis of the sequence listing:						
	$\overline{}$	contained in the international application in written form.						
		filed together with the international application in computer readable form.						
		furnished subsequ	ently to this Authority in written form.					
		furnished subsequently to this Authority in computer readable form.						
		uppi	the subsequently furnished written sequence listing does not go beyond the disclosure in the cation as filed has been furnished.					
		The statement that been furnished	the information recorded in computer readable form is identical to the written sequence listing has					
4.		The amendments l	nave resulted in the cancellation of:					
		the descri	ption, pages					
		the claims	Nos.					
		the drawi	ngs, sheets/fig.					
5.		This report has bee	on established as if (some of) the amendments had not been made, since they have been considered to losure as filed, as indicated in the Supplemental Box (Rule 70.2(c)).**					
**	Replacement sheets which have been furnished to the receiving Office in response to an invitation of the second state of the s							
**	report as "originally filed" and are not annexed to this report since they do not contain amendments (Rules 70.16 and 70.17). Any replacement sheet containing such amendments must be referred to under item 1 and annexed to this report							
	Any	replacement sheet co	ontaining such amendments must be referred to under item I and appeared to this report

CITATIONS

D1. US 6 361 797

D2. US 4 495 313

D3. EP 0 642 039

NOVELTY AND INVENTIVE STEP

<u>Claims 1-56</u>: The claimed invention relates to a polymeric hydrogel prepared from at least one monomer having at least one double bond, at least one crosslinker having at least two double bonds and an organic additive.

Each of citations D1 to D3 discloses a porous hydrogel prepared from 2-hydroxyethyl methacrylate (HEMA), ethylene glycol dimethacrylate (EGDMA) and polyethylene glycol (PEG). D1 also discloses the use of the hydrogel as a separation membrane. Hence, the claims are not novel and do involve an inventive step in the light of these citations.
